JustPayments

Genius Handheld POS Buyer sheet

U.S. equipment planning reference • November 18, 2026

For servers who want to take the order and payment at the table, or retail staff helping customers on the floor.

The dedicated handheld supports staff-assisted ordering and payment. Retail features can include item, price and inventory lookup on the configured software. Select the device generation, charging arrangement and network for your floor or patio. Attach model-specific specifications once the quoted model is known.

Buying question: How many people need a handheld at the same time during your busiest shift?

Confirm exact model, generation, region, enabled software features, mounting, power, network and accessories. Equipment, software, installation and processing are separate topics in a written quote. Photos are examples, not included bundles.
