JustPayments

Genius Kitchen Display System Buyer sheet

U.S. equipment planning reference • November 18, 2026

For a kitchen that needs to see open tickets, modifiers and prep status at each station.

Route configured orders to prep and expo screens. Touchscreens or bump bars can be used to advance tickets. Size the installation around prep stations, sight lines, mounting space and how staff work with wet or gloved hands.

Buying question: Do prep and expo each need a screen, and how will staff mark items complete?

Confirm exact model, generation, region, enabled software features, mounting, power, network and accessories. Equipment, software, installation and processing are separate topics in a written quote. Photos are examples, not included bundles.
