JustPayments

Genius Mobile Pay Buyer sheet

U.S. equipment planning reference • November 18, 2026

For an owner who wants to take a contactless payment on a compatible phone at a market, on location or curbside.

This option uses an eligible iPhone or Android phone. Include it as a phone compatibility inquiry. Check the phone model, operating system, app and merchant setup. Customers who need a chip-card reader or a full staff handheld should be able to compare that option.

Buying question: Which phone do you use, and where will you take payments?

Confirm exact model, generation, region, enabled software features, mounting, power, network and accessories. Equipment, software, installation and processing are separate topics in a written quote. Photos are examples, not included bundles.
